STANISLAUS REGIONAL TRANSIT AUTHORITY

EQUITY AND ACCESSIBILITY ADVISORY COMMITTEE MEETING 1111 I STREET, SUITE 308 STANCOG POLICY BOARD ROOM THURSDAY, MARCH 19, 2026 1:00 P.M.

In addition to in-person attendance at the location identified above, the following options are available to members of the public to listen, observe, and participate in real-time in this meeting and provide comments to the Equity and Accessibility Advisory Committee during the meeting:

1. You are strongly encouraged to listen to the meeting by joining the meeting from your computer or tablet.

Join Zoom Meeting:

<https://us06web.zoom.us/j/81347188438?pwd=aVh5TStGYTFOVGRqTWtkVk4xdmtTdz09>

Meeting ID: 813 4718 8438

Passcode: 664680

2. If you wish to make a comment on a specific agenda item, please wait for the Chair or Moderator to recognize you and you will be called on during the meeting.

If you are participating via telephone only you will still need to register on Zoom using the link above. You can submit your comments via email to info@stanrta.org or by calling 209-477-7011 by 3:00 p.m. on March 18, 2026.

Written Comments will be shared with Committee Members and placed into the record at the meeting. Every effort will be made to read comments received during the meeting into the record, but some comments may not be read due to time limitations. Comments received after an agenda item will be made part of the record if received before the end of the meeting.

Committee Agendas and Minutes: Board agendas, minutes, and copies of items to be considered by the Stanislaus Regional Transit Authority (StanRTA) Equity and Accessibility Advisory Committee are available at least 72 hours before the meeting on the StanRTA's website www.stanrta.org and at the StanRTA office located at 912 11th Street, Suite 100, Modesto, CA during normal business hours.

Materials related to an item on this Agenda submitted to the Committee Members after distribution of the agenda packet are available for public inspection at the address listed above during normal business hours. These documents are also available on the StanRTA website, subject to the staff's ability to post the documents before the meeting.

Reasonable Accommodations: This Agenda shall be made available upon request in appropriate alternative formats to persons with a disability, as required by the Americans with Disabilities Act of 1990 (42 U.S.C. § 12132) and the Ralph M. Brown Act (California Government Code § 54954.2). Persons requesting a disability related modification or accommodation in order to participate in the meeting should contact Valerie Fabela at (209) 477-7011 during regular business hours at least 72 hours prior to the time of the meeting to enable the Stanislaus Regional Transit Authority to make reasonable arrangements to ensure accessibility to this meeting.

Notice Regarding Non-English Speakers: Stanislaus Regional Transit Authority SEAAC meetings are conducted in English. Anyone wishing to address the Committee is advised to have an interpreter or to contact Valerie Fabela at (209) 477-7011 during regular business hours at least 72 hours prior to the time of the meeting so that the Stanislaus Regional Transit Authority can provide an interpreter.

Aviso con Respecto a Personas que no Hablan el Idioma de Inglés: Las reuniones de la Mesa Directiva del Consejo de Gobiernos de Stanislaus son conducidas en Inglés. Cualquier persona que desea dirigirse a la Mesa Directiva se le aconseja que traiga su propio intérprete o llame a Valerie Fabela al (209) 477-7011 durante horas de oficina regulares o a lo menos 72 horas antes de la reunión, para proporcionarle con un intérprete.

AGENDA

1. CALL TO ORDER

2. ROLL CALL

3. REMOTE PARTICIPATION DUE TO EMERGENCY CIRCUMSTANCES

- A. Motion to Approve Member Requests to Participate Remotely due to Emergency Circumstances pursuant to Government Code 54953(f)(2)(A)(ii)

4. PUBLIC COMMENTS

These matters may be presented only by interested persons in the audience. Discussion is limited to five minutes or at the discretion of the Chair.

5. CONSENT CALENDAR

- A. Motion to Approve the Minutes of November 13, 2025, meeting

6. DISCUSSION AND ACTION

- A. Motion to recommend that the Board of Directors approve by resolution the Equity Analysis of the Proposed Operations and Maintenance Facility Site
- B. Motion to recommend that the Board of Directors approve by resolution the Proposed Modifications to the Diminishing Balance Policy
- C. Motion to recommend that the Board of Directors approve by resolution the Proposed Modifications to the No Show and Late Cancellation Policy for Demand Response Services
- D. Short-Range Transit Plan Update

7. INFORMATION ITEMS

A. Key Performance Indicators

8. AGENCY REPORTS

B. CEO Report

9. COMMITTEE MEMBER REPORTS

STANISLAUS REGIONAL TRANSIT AUTHORITY

EQUITY AND ACCESSIBILITY ADVISORY COMMITTEE MEETING

Minutes of November 13, 2025
(Thursday) 1:00 p.m.

Important Notice Regarding COVID-19

COMMITTEE MEMBERS

PRESENT: Michael Wood, Mohamed Rashid, Nick Jensen, James Smith, John Luis, Angelica Gamboa, Jacinta Parker, Hannah Brady, Steven Evans

COMMITTEE MEMBERS ABSENT: Cesar Rubio, Vernon Snodderly

STAFF PRESENT: Valerie Fabela, Angela Swanson, Adam Barth

ALSO PRESENT: Monica Streeter (General Counsel); James Pratt (Information Technology); Ron McMurtry, Jessica Lee, Clifton Crabtree, Hector Medina

1. CALL TO ORDER

Vice Chair Jacinta Parker opened the meeting at 1:02 pm

2. ROLL CALL

A Quorum of the committee members was present.

3. REMOTE PARTICIPATION DUE TO EMERGENCY CIRCUMSTANCES

A. Motion to Approve Member Requests to Participate Remotely due to Emergency Circumstances pursuant to Government Code 54953(f)(2)(A)(ii)

No remote participants.

4. PUBLIC COMMENTS

These matters may be presented only by interested persons in the audience. Discussion is limited to five minutes or at the discretion of the Chair.

No public comment.

5. CONSENT CALENDAR

A. Motion to Approve the Minutes of September 11, 2025, meeting.

By Motion, (Committee Members Jim Smith and Mohamed Rashid), and a 9-0 vote, the Stanislaus Equity and Accessibility Advisory Committee Approved Item 5A.

6. DISCUSSION AND ACTION

A. Motion to recommend that the Board of Directors approve by resolution the 2025 Service Monitoring Report

Senior Transit Analyst Angela Swanson gave a presentation regarding the 2025 Service Monitoring Report.

By Motion, (Committee Members Jim Smith and Mohamed Rashid), and a 9-0 vote, the Stanislaus Equity and Accessibility Advisory Committee Approved Item 6A.

B. Motion to recommend that the Board of Directors approve by resolution the 2022-2025 Title VI Program Update

Senior Transit Analyst Angela Swanson gave a presentation regarding the 2022-2025 Title VI Program Update

By Motion, (Committee Members Steven Evans and Michael Wood), and a 9-0 vote, the Stanislaus Equity and Accessibility Advisory Committee Approved Item 6B.

C. Short-Range Transit Plan

A team from Kimley Horn gave a presentation regarding Short-Range Transit Plan.

7. AGENCY REPORTS

A. CEO Report

Adam Barth shared that StanRTA will continue the annual tradition of providing free rides to the Modesto Centre Plaza for the Thanksgiving dinner event.

December is a free ride on all modes to promote public transportation.

The Operations Maintenance Facility should be closing escrow soon.

B. Marketing Update

No marketing updates to report.

8. COMMITTEE MEMBER REPORTS

Michael Wood had questions regarding route 33.

Mohamed Rashid shared some of his concerns with the timing of the routes and the safety on the paratransit.

Jacinta Parker shared a reported lengthy 2-hour ride on paratransit.

9. ADJOURNMENT

Adjournment: Meeting adjourned at 2:14 PM

Next Regularly Scheduled Equity and Accessibility Advisory Committee February 12, 2026, at 1:00 pm.

DATE: March 19, 2026
TO: StanRTA Equity and Accessibility Advisory Committee
FROM: Angela Swanson, Senior Transit Analyst
RE: Equity Analysis of Proposed Operations and Maintenance Facility Site

Agenda Item: [6A]

Background

Title VI of the Civil Rights Act of 1964 (42 U.S. Code 2000d) protects individuals from discrimination based on race, color, and national origin in programs and activities that receive federal financial assistance. As a recipient of federal funding, the Stanislaus Regional Transit Authority (StanRTA) is obligated to assess how the location of a proposed facility may affect the surrounding minority and low-income communities, ensuring that the site selection process is conducted in a non-discriminatory manner. In compliance with Title VI, StanRTA conducted a facility equity analysis to confirm that the planned new Operations and Maintenance Facility, located at 3807 Crows Landing Road, was chosen without any bias toward race, color, or national origin.

Discussion

The StanRTA Equity and Accessibility Advisory Committee (SEAAC) serves as StanRTA's official community advisory group, tasked with reviewing operational and policy decisions for compliance with Title VI regulations, among other responsibilities. The SEAAC has been invited to examine the equity analysis of the site intended for the future Operations and Maintenance Facility using the lens of civil rights. The SEAAC is requested to review the report (Attachment 1) and, upon that review, make a recommendation to the Board of Directors.

Recommendation

It is recommended that the StanRTA Equity and Accessibility Advisory Committee:

Recommend that the Board of Directors, by resolution, approve the Equity Analysis of the Proposed Operations and Maintenance Facility Site and Project.

6. Alternative Equity Analysis and Cumulative Impacts	12
7. Conclusion	14

Executive Summary

Before constructing new facilities, recipients of federal transportation funding must evaluate how the location of a proposed facility may impact the surrounding minority and low-income communities. While the potential environmental impacts of constructing and operating a facility must be analyzed, the site's selection also requires scrutiny to ensure it was chosen in a non-discriminatory manner.

In 2024, the Stanislaus Regional Transit Authority (StanRTA) began searching for suitable sites to develop a permanent transit headquarters. This facility will accommodate the agency's staff, the operations contractor, and the maintenance group, and include a bus yard capable of holding over 138 buses. Concurrently, a site-agnostic master planning and facility programming process was initiated to better understand the agency's specific needs. These parallel processes have led to the identification of a preferred site and the development of a comprehensive facility master plan.

As required by Title VI of the Civil Rights Act of 1964, StanRTA conducted a Fixed Facility Equity Analysis to ensure that the location of the planned new Operations and Maintenance Facility Complex was selected without regard to race, color, or national origin. Along with data and studies performed as part of the environmental review process, StanRTA has concluded that developing an Operations and Bus Maintenance Facility at 3807 Crows Landing Road in Ceres, California, would not result in a disparate impact on minority or low-income populations.

StanRTA also offers the required complementary paratransit service. Additionally, StanRTA provides demand-responsive services, Medivan, a daily service from the Modesto Transit Center to major medical facilities throughout the San Francisco Bay Area, and Dial-A-Ride services available to the general public in the communities of Oakdale, Patterson, and Riverbank. ADA paratransit services are offered 365 days a year, while the fixed-route service operates seven days a week, except on six holidays. Weekday service operates between 4:45 am and 11:00 pm, with Saturday service running from 6:00 am to 10:00 pm and Sunday service operating from 9:00 am to 8:00 pm.

2. Project Context

StanRTA, operating out of leased administrative and operational spaces since its formation in 2021, has quickly outgrown these facilities. The transit fleet, currently located at the City of Modesto’s Bus Maintenance Facility (BMF) at 1609 8th Street, exceeds the yard’s capacity, as it accommodates 138 vehicles despite being designed for fewer than 100 revenue vehicles. The space constraint is further exacerbated by the shift from fossil fuels to zero-emission vehicles. The fleet at present is comprised primarily of diesel and gasoline-powered vehicles, but is transitioning to a 100% zero-emission bus (ZEB) fleet in compliance with California’s Innovative Clean Transit (ICT) regulation. This regulation requires all public transit agencies to complete the transition to a ZEB fleet by 2040. StanRTA began diversifying the fleet through the acquisition of Proterra battery electric buses (BEB) and, most recently, purchased two BEBs from Gillig.

StanRTA is also testing out the other ZEB option, hydrogen-fuel cell technology, with the acquisition of three hydrogen buses from New Flyer. Both hydrogen and battery electric buses require specialized, space-intensive charging infrastructure. Zero-emission buses (ZEBs) are powered by either electrically charged batteries or hydrogen-fueled batteries. StanRTA is piloting the hydrogen option with an initial purchase of three New Flyer Excelsior 40-foot heavy-duty hydrogen buses. To operate the hydrogen bus fleet, a hydrogen fueling station is essential. At present, a compact mobile station is planned for the crowded Bus Maintenance Facility yard. Battery electric and hydrogen fuel technologies each require installation of specialized charging equipment that is unsustainable at the BMF’s due to infrastructure limitations. This limitation is in addition to the site’s size constraints.

The BMF is not alone in being overtaxed by StanRTA’s needs. The operations staff is divided between the BMF and the Modesto Transit Center (MTC), leading to performance inefficiencies. Functional spaces such as training and interview rooms, offices, and secure parking are in short supply. Meanwhile, StanRTA’s personnel are officed in leased office space two blocks from the MTC, which is also constrained. The agency has no meeting facilities to conduct policy business, nor ADA-compliant meeting areas available for the general public.

3. Title VI Compliance

Under Title VI of the Civil Rights Act of 1964, no person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. As a recipient of federal funds, StanRTA is required to conduct a Fixed Facility Equity Analysis, highlighted in both the federal Title VI guidance¹ and under Title 49 of the Code of Federal Regulation², that is intended to ensure that the location is selected without regard to race, color, or national origin. This analysis must also “give attention to other facilities with similar impacts in the area to determine if any cumulative adverse impacts might result.”

The purpose of the Title VI Equity Analysis is to determine whether the site selected for the administration, operations, and maintenance facility (OMF) complex will disproportionately impact or burden people on the basis of race, color, or national origin. The site selected for the OMF is an undeveloped parcel on the corner of Crows Landing and Service Roads. It is ideally situated directly across the street from the Stanislaus County Agricultural Center. Nearby are the Stanislaus County Jail, Sheriff’s Department, and Fleet Services. The parcel is within the City of Ceres’ West Landing Specific Plan in facilities zoned for business and industrial purposes.

StanRTA operates its service without regard to race, color, or national origin and is committed to ensuring that no person is excluded from participation in or denied the benefits of its transit services based on race, color, or national origin, as outlined by the provisions in Federal Transit Administration (FTA) circular 4702.1.B. StanRTA adheres to both the General Title VI requirements (Chapter III) and the Requirements of Fixed-Route Transit Providers (Chapter IV). Further, Title 49 CFR Section 21.5(b)(3) states,

"In determining the site or location of facilities, a recipient or applicant may not make selections with the purpose or effect of excluding persons from, denying them the benefits of, or subjecting them to discrimination under any program to which this regulation applies, on the grounds of race, color, or national origin; or with the purpose of effect of defeating or substantially impairing the accomplishment of the objectives of the Act or this part."

Finally, Title 49 CFR Part 21, Appendix C, Section 3(iv) provides that, "The location of projects requiring land acquisition and the displacement of persons from their residences and businesses may not be determined on the basis of race, color, or national origin."

The current StanRTA Title VI plan is here: <https://stanrta.org/327/Title-VI-Information>

4. Site Selection Process

In 2024, StanRTA began searching for a site to accommodate an administration, operations, and maintenance facility and the bus fleet. At the same time, work commenced on the master plan for the component spaces, known as the Operations and Maintenance Facility (OMF) project. The master plan was completed in July 2025. The master plan was developed based on projected needs through 2050. Based on this projection, the proposed facility would need to accommodate 198 fleet vehicles and a combined 417 staff (operations, maintenance, administration). Criteria for the facility were first developed as an outcome of preparing the Zero Emission Bus (ZEB) Strategy and Rollout Plan in April 2023. The ZEB plan, a California requirement, provided a detailed plan of the technology, needs, and strategies to help StanRTA transition to a ZEB fleet, including development of a permanent facility. The ZEB plan identified detailed criteria for a maintenance and operations facility to serve current (circa 2023) needs. Those criteria were simplified to facilitate the site selection process:

- 12+ developable acres
- Reasonable proximity to the beginning and/or end points for fixed route revenue service
- Located within proximity of Stanislaus County’s urban core in Modesto/Ceres
- In an area with compatible zoning (business/industrial) and away from residential neighborhoods
- Free of hazardous waste or significant environmental remediation
- Established or available communications, water, electric, and sewer service required to support daily operations
- Electrical grid with capacity for a potential future BEB fleet

The most important of the criteria identified through the ZEB plan was establishing the minimum required site size and co-location of agency functions. As StanRTA operates entirely out of leased spaces, the selected site must be able to house agency staff, the contracted operations team, and maintenance functions, in addition to the bus yard, wash, and fueling functions. As noted in the ZEB plan, “The administrative functions of StanRTA are currently at a separate site from the operations and maintenance functions, introducing challenges and a suboptimal arrangement that is better suited with all transit agency functions on one site.”

The second criterion – location with respect to the start and end points of revenue service – is necessary to minimize non-revenue (“deadhead”) vehicle-miles and vehicle-hours. It should be noted that deadhead operating costs occur daily for the life of the facility. Excess deadhead costs can become large over time and can affect the ability to provide service. StanRTA’s primary operations, both now and projected in the future, are concentrated in the greater Modesto urbanized area. In the future, additional locations can be considered for transit hubs based on regional growth and evolving needs.

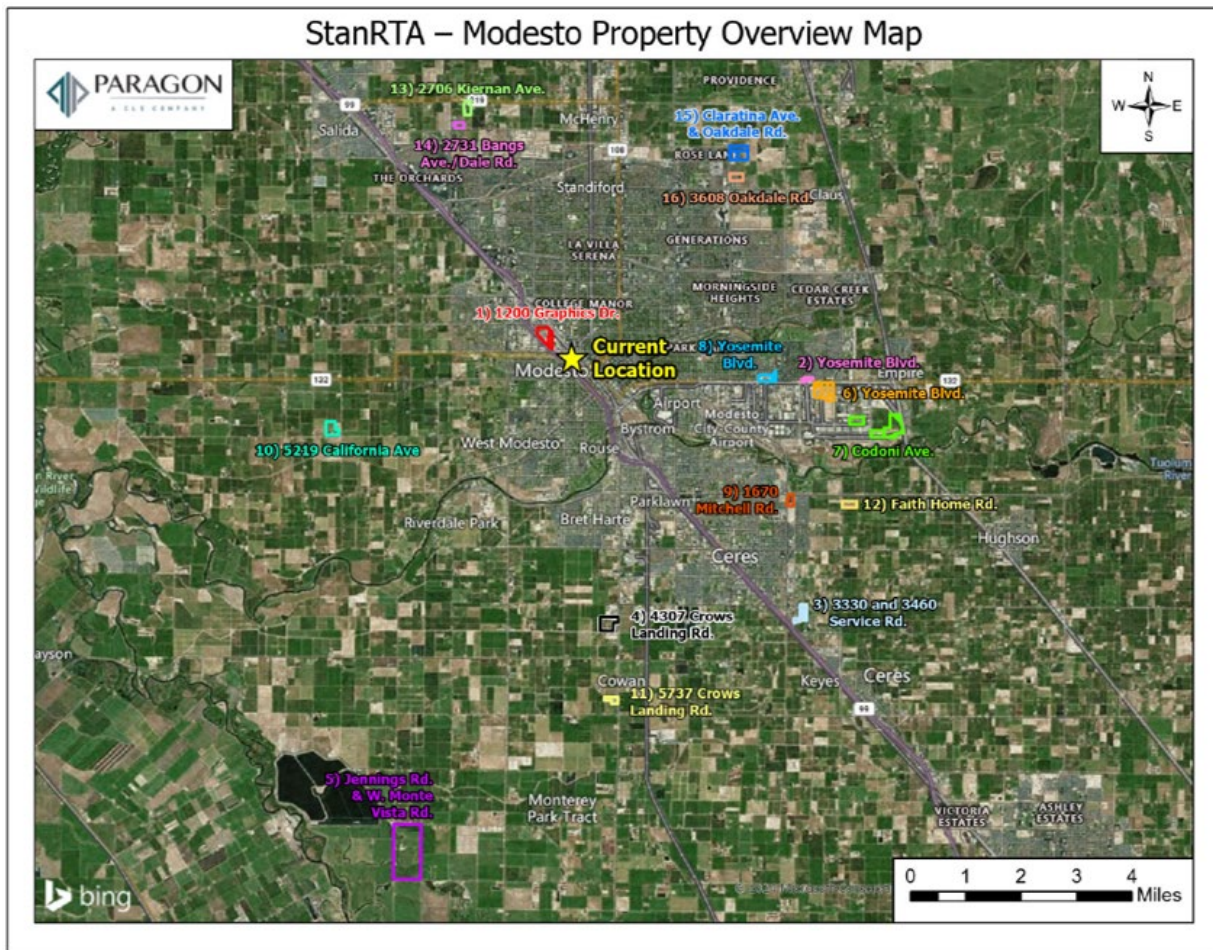

StanRTA’s facility master plan began with a space programming exercise. Through the programming effort, which addressed the agency’s current space needs and future growth anticipated through 2050, the site requirements were further refined. The updated specifications included:

- Minimum 16-20 developable acres
- Capacity for a 200-vehicle fleet, including the potential for 60-ft long articulated buses
- Diversified fleet powered through a mix of electric battery, hydrogen fuel cell, diesel, gasoline, and CNG to support a hydrogen fueling station
- Capacity for a combined staff of over 400
- Possible consolidation of all transit services in Stanislaus County

Several sites meeting the minimum criteria were identified and evaluated as potential candidates for the new facility (Figure 1). These sites were distributed throughout the target area and either met or could meet the established minimum criteria. A total of sixteen sites¹ were identified and considered between February and December 2024, with all but one falling out of consideration.

Figure 2. Sites Considered for New Facility

In the initial phase of site identification, the property team focused on industrial corridors in Modesto, exploring both on-market and off-market properties. Unfortunately, several promising

¹ In some cases, a site was composed of multiple smaller adjacent properties that, if purchased together, would be appropriately sized.

options were lost to other private sector buyers who are not restricted by the public agency regulations that govern site acquisition.

During the investigation of a well-located site in downtown Modesto, potential hazardous waste remediation issues were discovered, which disqualified the site from consideration. In addition, some properties were taken off the market, and in several cases, the likelihood of successfully rezoning the property was deemed low. A list of these sites can be found in Table 1.

Table 1. List of Potential Sites for the OMF

16	083-004-013	3608 Oakdale Rd	Commercial	19.67

Six months into the site investigation process, a property was identified at the intersection of Crows Landing and Service Roads. Owned by a local development company with plans for warehousing facilities, the property met StanRTA’s criteria and had the additional benefit of prior environmental investigations. As confirmed by the Ceres Director of Community Development, this larger parcel was identified as part of an approved Specific Plan, enabling controlled development and buildout of industrial, residential, and other uses. The property owner expressed a willingness to cooperate

with StanRTA and the City of Ceres to subdivide their 57.34-acre parcel, making approximately 30 acres available for StanRTA’s project.

Figure 3. 3807 Crows Landing Road

The proposed site satisfied StanRTA’s search criteria, and it also had the added advantage of being located next to existing county government facilities and commercial businesses. Unfortunately, the property owner, who had a warehouse development project ready for submission to local planning authorities for approval, was unable to proceed with the usual steps for land acquisition by a governmental agency. This site, like other previous options, was at risk of being lost following the typical site evaluation process.

StanRTA, as a recipient of federal funding through the Federal Transit Administration (FTA), is subject to the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970; commonly referred to as the Uniform Act. The Uniform Act provides relief from acquisition requirements to local agencies that can demonstrate that their project qualifies as an “acquisition of land for a hardship or protective purposes².”

“Protective acquisition is done to prevent imminent development of a parcel that may be needed for

² Code of Federal Regulations. 23 CFR part 771.118(d)(3)(ii)

a proposed transportation corridor or site. Documentation must clearly demonstrate that development of the land would preclude future transportation use and that such development is imminent. Advance acquisition is not permitted for the sole purpose of reducing the cost of property for a proposed project.”

In November 2024, the Federal Transit Administration (FTA) granted StanRTA approval to proceed with the purchase of 3807 Crows Landing Road by providing a Categorical Exclusion for Protective Acquisition. This action allowed StanRTA to move forward with negotiations for the property, although it did not permit any development of the proposed project at that time. The property negotiations were concluded, the site was subdivided, and ownership was transferred to StanRTA on December 3, 2025.

While the FTA’s categorical exclusion made it possible for StanRTA to purchase the land, the agency is still required to complete an equity analysis of the project before proceeding with any development plans.

5. Benefits and Burdens Analysis

StanRTA reviewed the benefits and burdens of the selected site to determine any community impacts of a new OMF. Table 2 presents the benefits and burdens of the site.

Table 2. Benefits and Burdens of 3807 Crows Landing Road

Site	Benefits/Positive Impacts	Burdens/Adverse Impacts
3807 Crows Landing Road Ceres, CA	<ul style="list-style-type: none"> • Zoned for Industrial/Business Park and part of the West Land Specific Plan (WLSP) • Programmatic EIR Completed • Creates a new street and signalized intersection • No adjacent residential impacts • Good access to transportation corridors • Approximately 4.8miles from transit center • No displacement of residents or businesses 	<ul style="list-style-type: none"> • Fleet will increase traffic surrounding the site due to employees entering/leaving the facility • Noise levels and traffic during construction • Potential for increased deadhead travelling to Modesto Transit Center • Demolish an unoccupied single-family residence

6. Alternative Equity Analysis and Cumulative Impacts

An equity analysis was conducted to compare the potential site location with Stanislaus County based on various demographic factors. The aim was to determine whether the facility would impact minority groups, low-income populations, and individuals with Limited English Proficiency (LEP). The statistics are presented in Table 3.

The table indicates that the census tract, similar to Stanislaus County, is characterized as a minority-majority region, predominantly consisting of individuals who are non-White or of Hispanic/Latino origin. While the Limited English Proficient (LEP) population, defined as those who identify as "speaking English less than very well," is small, it is significant. The census tract has a higher percentage of minority individuals and a greater rate of LEP individuals compared to the county overall. However, this group is spread across 33.2 square miles of rural, unincorporated Stanislaus County, suggesting that the immediate vicinity of the facility will experience only limited impact.

Table 3. Demographic Factors for the Site and County

Demographic Factor	3807 Crows Landing Rd Block Group 3 Census Tract 31		Stanislaus County	
	Number	Percent	Number	Percent
Total Population	1,866	100%	552,878	100%
Minority Population	1,205	64.6%	296,276	53.6%
Non-Minority Population	661	35.4%	256,602	46.4%
Limited English Proficient Populations*	354	18.9%	71,134	12.9%

Source: American Community Survey 5-Year; 2023-2019

Figure 4 captures graphically the data represented in Table 3. Census Tract 31, Block 3, is highlighted in white. The project site is a small blue square, and the blocks shaded in tones of purple identify concentrations of individuals who are non-White or of Hispanic/Latino origin, broken down by block group. The figure provides some perspective on the census block's size, 33.2 square miles. The areas in dark purple are the cities of Modesto, Ceres, and Turlock by comparison.

Figure 4. Minority Population Map with Project Site and Census Block Highlighted

As part of the equity analysis and the agency’s Public Participation Plan, StanRTA is inviting the public to submit comments on the proposed project. Any comments received while the analysis is available for public comment will be shared with the StanRTA Equity and Accessibility Advisory Committee (SEAAC) and the Board of Directors. The report will be hosted on StanRTA’s website.

7. Conclusion

The location at 3807 Crows Landing Road was selected for StanRTA's maintenance and operations facility without regard to race, color, or national origin. An evaluation of the site's demographics (as compared to the existing location) shows that no disparate impact will occur through the selection of this site. This is based on the fact that there is no residential population within proximity to the site. There is also no cumulative impact from the proposed site, as the number of nearby businesses is limited and only the previous property owner provides the same type of services. Therefore, the conclusion from this Title VI Site Equity Analysis is that there is no apparent disparate impact for the proposed location at 3807 Crows Landing Road.

Ride the

STANISLAUS REGIONAL TRANSIT AUTHORITY

DATE: March 19, 2026
TO: Equity and Accessibility Advisory Committee
FROM: Angela Swanson, Senior Transit Analyst
RE: Proposed Policy for Demand Response User Diminishing Balance Accounts

Agenda Item: [6B]

Background:

The Stanislaus Regional Transit Authority (StanRTA) operates a demand response service that includes the federally mandated complementary paratransit service for individuals with disabilities and dial-a-ride programs available to the general public. Offered as a door-to-door service, meaning that the bus comes to the passenger's location and provides service from their doorway onto the vehicle and to their destination's doorway, demand response trips are prescheduled rides generally booked at least the day before travel. Scheduling and trip management are managed with Ecolane CAD/AVL software. This software also includes a fare module that allows passengers to deposit funds into an account and draw down that balance each time they board the bus. The fare module allows passengers to travel without a ticket or exact change for the \$2.50 one-way fare.

Discussion:

The diminishing balance feature has been in place for approximately one year following a successful pilot phase. While the program has performed effectively, it would benefit from formalized policy guidance to standardize and govern its use. The proposed policy establishes clear parameters in the following areas:

- Diminishing balance (drawdown) accounts are capped at \$250
- Once deposited, funds cannot be refunded
- Fares in the drawdown account have no expiration date
- Use of the drawdown account to pay a fare may not result in a negative account balance
- Failure to repay overdrafts on drawdown accounts can result in a cash/ticket only

limitation until the debt is paid

How Diminishing Balance Accounts Work

Diminishing Balance accounts have been established for 723 of the 2,603 unique passengers that used the demand response service in FY 2025. Not only has this become a popular option with individual passengers, but it is also gaining traction with social service agencies such as MOVE Stanislaus, which subsidize travel for their qualifying clientele. The agency sends a check with a manifest identifying the clients that will receive the funds and the amount to be credited to each account. The account is credited and automatically available during the bus trip. The bus operator enters the fare on their tablet when the passenger boards. A statement is sent to the agency each month detailing each client's usage. That statement informs the agency of the account's remaining balance, enabling the agency to customize replenishment levels for each client. The result is that passengers can use StanRTA's demand response service, secure in the knowledge that they have funds to cover their transportation, and the grantor has better control over fund expenditure than if tickets were purchased and distributed each month.

The proposed Diminishing Balance Account Policy will establish clear expectations for StanRTA and its operations team, as well as for our passengers who benefit from a prepaid fare option. Current practice allows these accounts to reach a negative balance of up to \$10. Unfortunately, the software system, in its current iteration, cannot prevent accepting charges that push accounts over \$10 in the red. Since 2023, negative balances up to \$5 were incurred by 331 passengers. Another 96 passengers have balances between \$5 - \$25. While severe abuse of this system is rare, there are five accounts with more than \$25 unpaid.

Table 1. Summary of Overdrawn Accounts

Negative Account Balance	# of Accounts
\$0.00 - \$5.00	331
Up to \$10.00	70
Up to \$25.00	26
Up to \$50.00	3
Over \$50.00	2

Depositing funds into the Diminishing Balance Account

As shown in Table 1, most account users are very responsible. However, the lack of accountability and procedural inconsistencies led to the recommendations made in the proposed policy. Those recommendations are summarized as follows:

1. Set a \$250 Cap on Accounts. The most frequent users of demand response services ride round-trip 20-25 times each month. The fare is \$2.50 per ride. This cap meets the needs of most individuals. Because StanRTA policy precludes fare

refunds (both fixed-route and demand-response), it is not recommended to exceed this cap.

2. Allow passenger fund balance to be transferred to either a) the sponsoring agency, or b) a qualifying family member for balances exceeding \$25. These balance transfers would occur if a passenger either dies, leaves the service area, or becomes unable to continue using demand response services.
3. Prohibit use of the drawdown account when such action would result in a negative balance. Passengers boarding the bus with insufficient balance to cover their fare will be required to pay in cash or use a ticket.
4. Options for Passengers Lacking Fare. As with fixed-route bus services, the operator has discretion to allow a passenger to board after paying a partial fare, grant a courtesy free trip, or deny the ride altogether. All such decisions by the bus operator are made in consultation with dispatch.
5. Passengers with Substantial Overdrafts will have 30 days to make repayment arrangements or lose the right to use a diminishing balance account.

Communicating the New Policy and Policy Effective Date

Staff recommend that these policy changes go into effect on July 1, 2026. The period between Board of Director approval and July 1 will be used to update StanRTA brochures, the website and the ADA Passenger Guide and promote that information to passengers. Passengers who have already established diminishing balance accounts will receive formal notification of the revised policy.

Fiscal Impact:

This policy creates no fiscal impact but may, by eliminating negative account balances, increase fare revenue.

Recommendation:

It is recommended that the StanRTA Equity and Accessibility Advisory Committee:

Recommend that the Board of Directors, by resolution, approve the Diminishing Balance Account policy.

Ride the

STANISLAUS REGIONAL TRANSIT AUTHORITY

DATE: March 19, 2026
TO: Equity and Accessibility Advisory Committee
FROM: Angela Swanson, Senior Transit Analyst
RE: Update of the No Show and Late Cancellation Policies

Agenda Item: [6C]

Background:

StanRTA provides complementary paratransit service to eligible individuals who are unable to use the fixed-route system, ensuring equitable access to public transportation in compliance with the Americans with Disabilities Act (ADA). This door-to-door demand-response service is a critical component of the agency's mobility network, serving riders who depend on reliable, accessible transportation.

Paratransit trips are scheduled in advance and operated within a federally required one-hour negotiated pickup window. StanRTA is obligated to accommodate all qualified trip requests within its service area, and trip denials are prohibited under federal regulations administered by the Federal Transit Administration (FTA). To balance regulatory compliance, service reliability, and system capacity, federal guidelines authorize transit agencies to establish consequences for repeated missed trips ("No Shows") and late cancellations. A failure to take a scheduled trip or to cancel less than one hour before the pickup window, commonly referred to as a "Late Cancel," is classified as a "No Show" for purposes of this policy. StanRTA adopted a formal No Show Policy in April 2022 to promote rider accountability, preserve service availability, and support the efficient use of public resources. Transit policies, including the No Show policy, are periodically evaluated and, as needed, amended to improve the quality of services provided to our community.

Discussion:

The StanRTA No Show policy does several things. It defines a "No Show," establishes thresholds for imposing penalties, and outlines an administrative process to suspend passengers from using services for a reasonable period when they exhibit a pattern of missing scheduled trips. Additionally, the policy makes clear that trips missed due to reasons beyond the passenger's control, or attributable to the transit operator, will not incur penalties.

Passengers using demand-response services must reserve specific pickup and drop-off times at least one day in advance of their planned travel by calling reservations or scheduling a ride with StanRTA’s “Book the S” app. This allows schedulers to plan trips efficiently during operating hours, maximizing service for all passengers. Passengers receive reminder calls the night before their scheduled trips and again on the day of travel. Passengers can cancel their trips without penalty up to one hour before their pickup window by calling customer service. When a passenger develops a pattern of frequent, short-notice cancellations, it places additional strain on ADA paratransit services, particularly during high-demand service hours.

StanRTA’s No Show policy initially served as an effective deterrent to system abuse. However, as ridership has increased, so has the No Show rate. These unfulfilled trips increase operating costs and inconvenience passengers, who may experience delays or unnecessarily long rides when operators make trips to locations where passengers are unavailable or choose not to take their scheduled trips.

Table 1 illustrates the trend in No Shows from July 1, 2022, to December 31, 2025. The No Show rate has hovered below 4% but is trending up in the current fiscal year. Even this relatively low rate of No Shows has a significant impact on system performance and passengers' well-being. However, there is an upward trend in the first half of FY 2026, which is concerning given that enforcement efforts and counseling of riders prone to No Shows have been ongoing since June 2025.

Table 1 No Show Trends

Period	Trips Booked	Trips Taken	No Shows ¹	No Show %
FY 2022-23	130,449	125,750	4,699	3.6%
FY 2023-24	146,230	141,465	4,765	3.3%
FY 2024-25	161,467	156,164	5,304	3.3%
FY 2025-26*	84,136	81,038	3,079	3.7%

*July – December 2025

Despite routine enforcement, which has included suspending passengers' travel rights for up to 30 consecutive days, the system continues to face challenges from No Shows. The impact on StanRTA can also be measured in lost productivity, specifically in terms of revenue hours. The cost per trip for demand response service is \$68.46. For Fiscal Year 2024-25, the cumulative impact of No Shows was \$363,112 in lost service.

No Show Policy Offenders

In Fiscal Year 2024-25, StanRTA provided demand response services to 2,347 individual passengers. The most frequent service user completed 935 trips, averaging 3 trips per day, while many passengers used the service for a single one-way or round trip. This underscores the vital role of demand response services. Whether used once a year or multiple times each day, the bus provides freedom to individuals, allowing them to be

¹ Source: Ecolane. System Productivity Report

engaged in their community. Studying the data, the rate of No Shows does not correlate with the frequency the passenger uses the transit system.

Table 2 Comparison of the Highest No Shows with Ridership

Rank	Most No Shows			Most Completed Trips		
	Total Trips	Total No Shows	% No Shows	Total Trips	Total No Shows	% No Shows
1.	100	73	73%	935	21	2%
2.	110	61	55%	696	6	1%
3.	73	59	81%	636	13	2%
4.	132	52	40%	591	24	4%
5.	334	48	14%	585	1	NA
6.	224	44	20%	543	9	2%
7.	125	43	34%	540	7	1%
8.	133	42	32%	530	0	NA
9.	328	40	12%	511	9	2%
10.	257	35	14%	504	0	NA

Scope of the Problem

Table 2 presents two Top 10 lists related to No Shows. On the left is the list of demand response riders with the highest number of No Show incidents, compared with those with the highest service usage in 2025. The No Show group recorded up to an 81% No Show rate and no less than a 12% No Show rate. This group also demonstrated familiarity with the system, averaging 151 trips per year. In contrast, the Top 10 most frequent riders showed that trip frequency is not predictive of No Shows. The top system user recorded 935 trips (averaging 78 per month) and 21 No Shows, averaging less than 2 per month.

Intervention Process Prior to Issuing Suspensions

Passengers demonstrating a pattern of failure to cancel trips are first issued warnings for two months prior to suspension. The customer service team reviews incidents daily. Once verified the passenger is notified that they have received a No Show. The full No Show Policy, including the progressive system of warnings and penalties, is contained in Attachment 2.

Options Proposed for Revising the No Show Penalty

Staff identified three options for updating the No Show policy as follows:

1. Make minor corrections to the current No Show Policy.
2. Revise the No Show Policy to be stricter, following somewhat the same methodology.
3. Revise the No Show Policy to be stricter, using a different approach to the calculations.

The full discussion of these options is contained in Attachment 1.

Additional Recommendations to the No Show Policy

In addition to resetting the suspension calculation format and suspension periods, staff also recommend the following:

- *Medical Services.* Introduce clarification in the policy addressing the suspension of service for individuals using ADA paratransit for medical services. Currently, StanRTA allows individuals under suspension to use the service for life-saving treatments, such as dialysis, chemotherapy, or radiation therapy. However, some individuals continue to incur No Shows without any consequences under this policy. Under the ADA, StanRTA has the right to withhold service during a suspension for individuals receiving life-saving treatments. Passengers are notified of their suspension dates at least two weeks in advance, providing them with time to make alternative travel arrangements.
- *Restrict Access to the Book the S app.* Limit access to the "Book the S" application for individuals who accumulate multiple suspensions. Some passengers misuse the app by creating multiple bookings for the same destination and then neglecting to cancel them.
- *Rewards for Good Behavior.* Passengers who complete 24 trips without a No Show within a rolling 90-day period will be awarded a free one-way trip, with a limit of two free trips per month.

Communicating the New Policy and Policy Effective Date

The staff recommends that the enforcement of the new policy become effective on April 1, 2026, following Board of Directors approval at its March meeting. Enforcement of the revised policy is recommended to begin on July 1, 2026. Between those dates, the StanRTA staff will communicate the changes. This outreach aims to raise passenger awareness of their travel habits, encourage better communication with reservations, and facilitate discussions on necessary scheduling adjustments to minimize late cancellations.

Fiscal Impact:

Costs associated with administering this policy are included within the FY2025/26 budget.

Recommendation:

It is recommended that the StanRTA Equity and Accessibility Advisory Committee:

Recommend that the Board of Directors, by resolution, approve the revised No Show/Late Cancellation and Suspension Policy and adopt Option _____.

Attachments

1. Options for Calculating the No Show Suspension
2. Complete No Show Policy

**Attachment 1
Options for Calculating No Shows**

Option 1 –Retain Existing No Show/Late Cancellation Policy with Minor Corrections.

The No Show policy must be revised slightly to correct ambiguous language and allow consistent enforcement. The change clarifies that suspension can occur after two (2) No Shows are accumulated in any given month for passengers completing up to 30 trips. When more than 30 trips are taken, the calculation shifts to a percentage rate.

0-30 Trips/Month	2 No Shows Allowed before Suspension
31 or More Trips/Month	3 or More No Shows. Calculated as exceeding 10% of completed trips.

Option 2 – Make No Show Policy Consequences Stricter

This option is similar to the existing policy in that it establishes a baseline number of No Shows required to trigger a suspension. It adds a second qualifying factor that looks at total trips completed. Adding the qualifying factor provides leeway for high-frequency riders who may incur No Shows.

No Trip Minimum or Maximum	<p>3 or More No Shows ---and--- No Shows are at least 6% of Trips</p> <p>Example: 25 trips, 4 No Shows Received. 6%= 1.5 No Shows. Rider qualifies for suspension.</p>
----------------------------	--

Option 3 – Change the No Show Policy Calculation Basis to a Variable Percentage of Trips Taken

This format better correlates the No Show rate with trip frequency. Individuals with a low ridership frequency (10 or fewer trips per month) must have a cancellation rate of 40% to be considered for suspension. Individuals who ride more frequently (11+ trips per month) have a lower threshold (25% No Show rate) for potential disciplinary action.

10 or Under Trips/Month	No Show or late-cancel 40% or more of trips can result in suspension. Example: 9 trips, 4 No Shows $40\% = 3.6$ (round to 4) Rider qualifies for suspension.
11 or More Trips/Month	No Show or late-cancel 25% or more of trips can result in suspension. Example: 24 trips, 7 No Shows $25\% = 6$ Rider qualifies for suspension.

The impact of the various No Show policy options is depicted in the table below. Using a sample period of September – November 2025, staff analyzed the number of passengers that would be subject to possible suspension under the policy options. The results show that Option 1, the policy most closely resembling current practices, leads to more suspension infractions, while Option 3, which is based on the number of trips taken and the percentage of trips missed, results in the fewest suspensions.

Table 1. Comparison of Suspensions Issued by Option

Month	Option 1	Option 2	Option 3	Current
September	32	31	12	25
October	28	33	12	28
November	23	23	8	23

Based on the comparison of options in Table 3, the staff recommends Option 2.

Attachment 2 Current No Show Policy (Adopted April 2022)

Passenger No-Shows and Passenger Responsibilities

Passengers are responsible for canceling any trips they no longer want or need. Passengers must call (209) 527 - 4900 at least one hour before the start of the pick-up window to cancel a trip. It is solely the passenger's responsibility to notify The S of all cancellations at least one hour before the scheduled pick-up window.

Passengers are provided with reminder notifications of their trips the night before their travel and the day of their travel. This is to help the passengers remember their trip.

Last Minute Cancellations

The S understands passengers sometimes have schedule changes or even forget a ride. However, these late changes place a strain on The S because a vehicle and driver may make a non-productive trip for a passenger who does not take the ride. This can make The S late to pick up and drop off other passengers. Passengers who show a pattern of late cancellations or no-shows may harm the system's function. They can be suspended from taking trips because of their no-shows.

No Show/Late Cancellation will not be assessed when:

- The staff made an error in the ride reservation
- The vehicle did not arrive at the location
- The vehicle arrived outside the pickup window or did not wait per policy
- The ride could not be taken due to an emergency beyond the passenger's control

Suspension for Missed Trips

The S Customer Service reviews and verifies each No Show and Late Cancellation to ensure accuracy before entering them into passenger records. At the end of each month, all passengers with validated missed trips will receive written notification that they have violated this policy and that they may be subject to a suspension of services. Suspensions are determined based on the passenger's excessive missed trips during the prior 12-month period.

The S also considers how many rides a passenger has completed in that month to ensure that frequent passengers are not unfairly penalized for occasional failures to complete a trip. Too many missed trips within a calendar month may result in service suspension. Before taking any action, The S considers how many rides a passenger has completed that month to ensure that frequent passengers are not unfairly penalized for occasional failures to complete a trip:

Number of Trips	Number of No-Show/ Late Cancellations
0 – 30	3 No Shows/Late Cancels
30+	10% or more of total trips

At the end of each month, The S will send out a letter of suspension to any passenger meeting the suspension thresholds. Suspensions begin at 7 days and increase depending upon how many times a passenger has been previously suspended within the previous 12 months.

Number of Suspensions within 12 months	Number of Days of Suspension
1st time	7days
2nd time	14 days
3rd time	21 days
4th time	30 days

Appeals Process

Passengers have a right to appeal suspension actions. The process for appeal is the same as used for fixed route service suspensions. Information on your rights to appeal a suspension can be found here: www.StanRTA.org/513/Appeals-Process.

Initial Appeal

A passenger has five (5) business days to request an initial review of the suspension order. If the suspension notice is not contested within five (5) business days after delivery of the notice, the prohibition order will be deemed final. Passengers may file their requests by phone, in electronic or written form, or in person. The StanRTA's appointed administrative review officer will have five (5) business days from the receipt of the contest to complete the review and issue a determination using the delivery methods described previously.

STANISLAUS REGIONAL TRANSIT AUTHORITY

DATE: March 19, 2026
TO: StanRTA Equity and Accessibility Advisory Committee
FROM: Angela Swanson, Senior Transit Analyst
RE: Short-Range Transit Plan and Bus Rapid Transit Analysis and Route Development Project Update

Agenda Item: [6D]

Background

A Short-Range Transit Plan (SRTP) is a document required by the Federal Transit Administration (FTA) that outlines a transit agency's services and operations over five years. The FTA further requires local agencies to periodically update their SRTPs. The Stanislaus Regional Transit Authority (StanRTA) prepared its initial SRTP in 2022. StanRTA engaged Kimley-Horn and Associates to assist in developing the next SRTP, a process that will run through the end of 2026. The SRTP process includes engaging the community to understand mobility needs and gather feedback, allowing StanRTA to set priorities and strategies aligned with revenue forecasts, and to include information such as service plans, budgets, and operational data. Ultimately, StanRTA will use the strategies outlined in the SRTP to guide the development of goals, objectives, and policies for future transit services in Stanislaus County. The project will conclude with the adoption of service recommendations and the creation of an implementation plan.

Discussion

Since the last presentation to the Equity and Accessibility Advisory Committee (SEAAC), Kimley-Horn has completed the Existing Conditions Report. This report details the StanRTA fixed-route bus network, the communities it serves, and the environment in which it operates. Additionally, a proposed overhaul of the fixed-route network has been developed. Public outreach and discussion of the proposed changes begins with a presentation at the March 26th Board of Directors meeting and continue through April 2026. The final network proposal will come to the SEAAC for comment prior to final board approval later in the summer.

Recommendation

This is an information-only item.

STANISLAUS REGIONAL TRANSIT AUTHORITY

Information Items

Ride the

STANISLAUS REGIONAL TRANSIT AUTHORITY

DATE: February 26, 2026
TO: Board of Directors
FROM: Ramon Salinas, Transit Planner
RE: January 2026 KPI Review

Agenda Item: [7A]

Background

StanRTA monitors monthly Key Performance Indicators (KPIs) across Fixed Route, Commuter, and Demand Response services to evaluate system reliability, safety, productivity, and customer experience. These indicators measure contractor performance, compliance with service standards, and operational trends impacting passengers and agency resources.

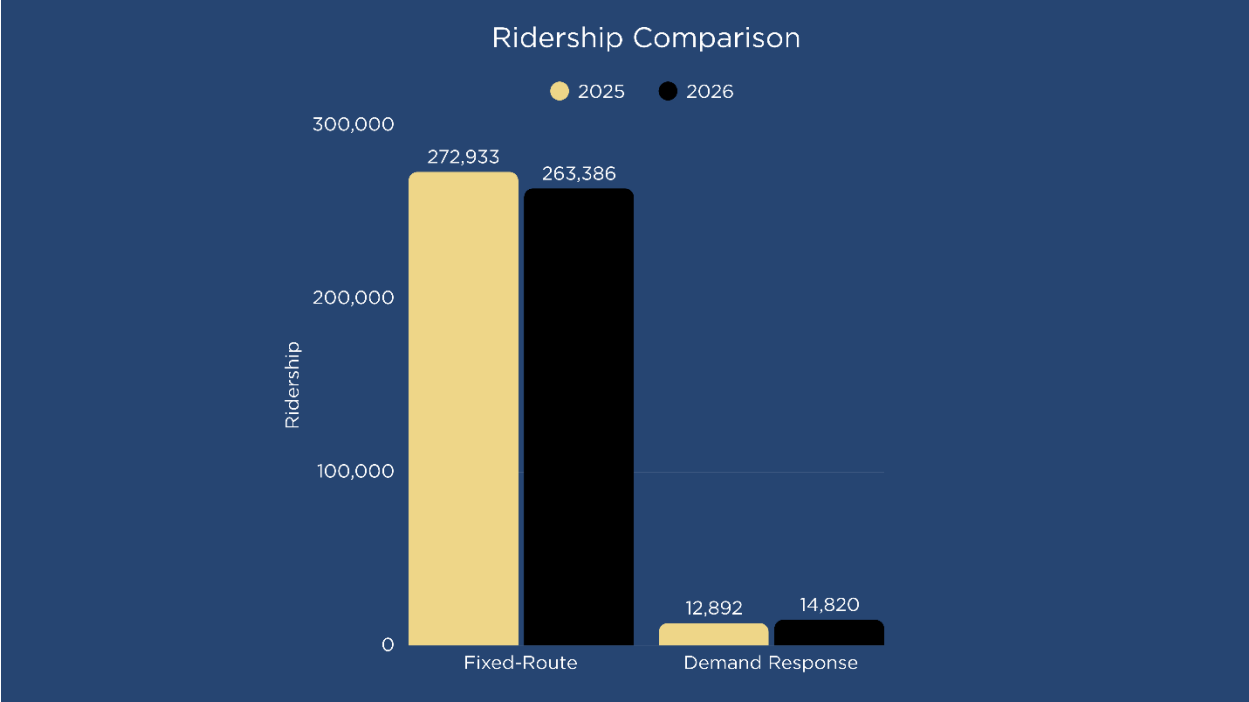

Discussion

Ridership Trends

Total Fixed Route ridership decreased approximately 3 percent compared to the same period last year, while Demand Response ridership increased approximately 15 percent.

Local routes experienced the largest declines, particularly Routes 22 and 23, while commuter routes to regional destinations increased, including the Modesto BART and Turlock/Patterson BART services.

This shift indicates stable regional commute demand and reduced discretionary local travel. Demand Response growth continues to place additional pressure on scheduling efficiency and fleet utilization.

Productivity

Demand Response productivity operated below the contractual standard of 2.4 passengers per hour.

Increased trip demand without corresponding routing efficiency has reduced productivity and increased operating cost per passenger. Staff will evaluate scheduling patterns with the contractor to improve trip grouping efficiency.

Safety

Demand Response recorded zero preventable collisions during the reporting period.

Fixed Route preventable collisions exceeded the agency safety threshold of 0.50 per 100,000 miles, operating at approximately 1.53.

No major injuries or fatalities occurred. However, the collision rate requires corrective action under the agency safety plan.

Maintenance and Reliability

Fleet reliability exceeded minimum standards for miles between failures on Fixed Route service.

Demand Response road calls decreased compared to the prior year and maintenance backlog was reduced.

While overall fleet condition remains acceptable, mechanical-related missed trips continue to occur and require monitoring.

Customer Experience

Complaint rates remained within acceptable limits across both modes.

Missed trips decreased in Demand Response service but remain present in Fixed Route operations due to reliability challenges. Early ADA arrivals and commuter delays represent the primary customer service risks.

Fiscal and Operational Impact

Reliability and productivity challenges directly affect operating cost efficiency and passenger satisfaction. Reduced Demand Response productivity increases cost per trip, while Fixed Route on-time performance impacts ridership retention and regional connectivity.

Recommendation

This item is informational only.

Staff will continue monitoring contractor performance and implement corrective operational reviews focused on:

- Fixed Route on-time performance improvement
- Collision reduction strategies
- Demand Response scheduling efficiency
- ADA window adherence compliance
